

SOFTWARE ENGINEER

+923349529394

LAMP architecture, Full stack JavaScript, Team Leadership, System Design, Web App Performance Optimization.

Software Engineer

January 2022 – Now

- "Strategically defined, planned, and prioritised innovative features to align seamlessly with overarching business objectives and product roadmap directives."
- "Expertly designed and developed new features, focusing on enhancing reliability and scalability, guided by comprehensive technical and design specifications."
- "Actively engaged in code review processes and provided mentorship to junior developers, fostering skill enhancement and knowledge sharing."
- "Contributed to the upkeep and evolution of legacy systems, integrating cutting-edge technologies and refining processes, including the implementation of Continuous Integration/Continuous Deployment (CI/CD) workflows."
- "Effectively communicated complex development milestones to non-technical stakeholders and company leadership, maintaining close collaboration with the Chief Product Officer to ensure project alignment."

September 2016 – February 2017

- Developed and maintained software in nodejs, golang and angularjs (legacy v1 app). The tech stack is split into multiple micro services, which handle the IoT and user centric aspects of the whole SAAS business.

October 2014 – August 2015

- Developed modules based on Zend framework. Also worked with some Symfony and Laravel.
- Upgraded legacy code to latest version based on Zend framework 2 for two websites i.e. Qatar & Bahrain
- Maintained the latest version across sites. Worked on the frontend for back-office and setup all blogs

April 2010 – June 2013

- 360 photography and development of www.rd360.com. Developed wordpress themes and plugins
- Multilingual website development on WP MU platform. Developed with jQuery

January 2009 – July 2009

- Developed in Pligg, Drupal & Drigg. Developed Frontend and drupal modules.
- Laid out the core for site, which later became peerindex.com. Acquired by brandwatch

January 2008 – December 2008

- Developed a PHP/ CodeIgniter based application for Silicon Valley Education foundation, San Jose
- Worked on www.lessonopoly.org funded by CISCO, acquired by www.gooru.org

BS in Computer Engineering – Served as teaching assistant in Algorithms and Operating Systems courses.

Fall 2002 – Spring 2007

PROJECTS

- **BackTable** - on the App Store. BackTable gives surgical sub-specialists a way to talk tools, situations, tips, and tricks, with one another, and with those who have a hand in patient care. It's the facebook meet Instagram meet LinkedIn for Doctors.
- **insydo** (2015) – Find Dubai's best activities, places and services based on impartial reviews by insydo's in-house team. The team has personally experienced hundreds of businesses and researched thousands to whittle down the top contenders.
- **Propertyfinder.ae** (2014) – UAE's #1 property site
- **Viewsflow / PeerIndex** (2009) – Acquired by brandwatch in 2015
- **Lessonopoly** (2008) – Facebook for teachers, acquired by and merged into www.gooru.org
- **Pakistanjs.com** - A community effort to help nurture JavaScript talent in Pakistan

LANGUAGES AND TECHNOLOGIES

LAMP; SQL; JavaScript; Wordpress; Laravel; Symfony; Zend Framework; Python (Novice); SASS; LESS, nodejs; angularjs; grunt; gulp; Golang; AngularJS, Angular 2/4 and recently Angular 5.

CURRENT INTERESTS

Learning new things on nodejs, coming up with better ways of architecting apps, micro-services, container(s) as a service, symphony framework, performance comparisons between different stacks, efficient algorithms designs with a bunch of technologies and finding ways to teach in small videos on pakistanjs.com and youtube. Another new interest is Golang and web assembly. Mobile development with JavaScript frameworks like react native and ionic is something that I find quite interesting.
